Debunking the Common Misconceptions About Refurbished Servers

A refurbished server refers to a used or returned server that is professionally cleaned, tested, and certified by refurbished hardware vendors to reinstate its original working ability.

Why Purchase **Refurbished Servers**

Buying refurbished servers offer numerous advantages to businesses in terms of cost, performance, and environmental safety.

- **Reduced** carbon footprint
- **Top-notch** performance at fractional costs
- **Extensive** warranty with easy part replacement
- **Multiple** customization options

Refurbished Server **Myths Vs. Reality**

Myths	Reality
Refurbished servers are sold with a massive discount	Refurbished servers are **cheaper than new ones**, but huge discounts aren't guaranteed. The discount varies between 20% to 80% based on server generation, type, etc.
Refurbished servers befit small businesses only	Refurbished servers can be **utilized by companies of all sizes** across industries without worrying about security, performance, and reliability
Refurbished servers offer suboptimal performance	Refurbished servers provide **guaranteed performance and reliability** similar to new ones as they are rigorously tested and repaired to function correctly
Refurbished servers don't last long	Refurbished servers have an **extended lifespan** compared to new servers as they are professionally maintained and monitored by refurbished hardware vendors
Refurbished servers come without a warranty	Refurbished servers come with a **lifetime warranty and advanced part replacement** support in most cases
Refurbished and used servers are identical	Refurbished servers offer best-in-class performance and extended warranty, and are **professionally re-engineered** before being sold, which isn't the case with used servers

Why Choose CXtec for **Refurbished Server Solutions**

As an experienced and certified network hardware solution provider, CXtec helps businesses worldwide achieve their sustainability goals and optimize IT infrastructure costs through its equal2new® certified high-quality refurbished server, storage, and networking solutions.
