## Secure your network with CXtec.

As a financial institution, you're constantly charged with maintaining tight and stringent security – and your network is no different. But what happens when you've made a significant investment in networking technology only to find that your hardware is no longer sold or supported by the manufacturer?

That's when you could use a technology partner like CXtec to help you get the most out of your networking, voice and cabling infrastructure. With years of experience in the financial industry, CXtec can help you attain the funds and the means to protect the investment you've already made, while you continue to strengthen your security measures. We offer new equipment, manufacturer authorized refurbished, our own equal2new® certified pre-owned hardware, and CABLExpress® Cables.

We can help you devise a plan to not only secure your network by implementing barriers, but also to monitor and respond to potential attacks with intrusion detection and prevention systems. All while leveraging your current infrastructure until it makes business sense to upgrade. Then our Asset Recovery Program offers you a way to expand your budget and liquidate your used equipment. ;-)

The CXtec logo features the word "cxtec" in a bold, lowercase, sans-serif font. A registered trademark symbol (®) is located to the upper right of the "c". A thin, curved line with a small cluster of dots at its end arches over the "x" and "t".

# Put your mind at ease with CXtec.
