4 WAYS ITAD CAN CONTRIBUTE
TO YOUR SUSTAINABILITY GOALS

According to the UN, global e-waste will touch 74 Mt by 2030.

As organizations turn to corporate sustainability, adopting an eco-friendly strategy, and building a sustainable IT infrastructure, conducting responsible waste management becomes crucial.

Asset recycling

Rather than disposing of the older hardware, a certified ITAD vendor can help you recycle parts of your hardware responsibly.

Asset repair and refurbishment

A good ITAD specialist can help identify and repair parts of retired assets with reusability or remarketing potential.

Four ways ITAD can help achieve your sustainability goals

Asset disposal and data sanitization

ITAD offers a safe disposal option for retired IT gear with zero reuse potential. These assets will be scrapped in an eco-friendly manner and in compliance with state and federal guidelines.

Asset resale

Professional ITAD vendors can help you remarket or resell your assets through various B2B and B2C channels.

Why choose CXtec?

Atlantix Global, a division of CXtec, is a certified ITAD services provider, helping organizations maximize value on surplus, decommissioned, and existing IT hardware. With 40+ years of experience, Atlantix Global is a partner of choice for organizations looking to achieve their sustainability goals with secure IT asset disposition services.
