

WHY PURCHASE REFURBISHED SERVERS

Buying refurbished servers offer numerous advantages to businesses in terms of cost, performance, and environmental safety.

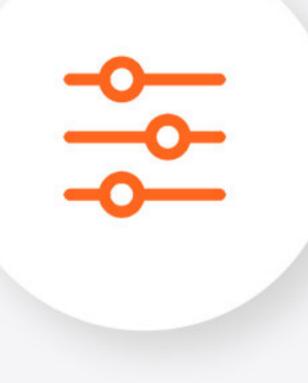

Top-notch
performance at fractional costs

Extensive warranty with easy part replacement

Multiple customization options

REFURBISHED SERVER MYTHS VS. REALITY

MYTHS

Refurbished servers are sold

Refurbished servers offer

suboptimal performance

small businesses only

Refurbished servers befit

Refurbished servers don't

last long

- Refurbished servers come without a warranty

are identical

Refurbished and used servers

REALITY

- Refurbished servers are cheaper than new ones, but huge discounts aren't guaranteed.
 The discount varies between 20% to 80% based on server generation, type, etc.
 - utilized by companies of all sizes across industries without worrying about security, performance, and reliability

Refurbished servers provide

Refurbished servers can be

guaranteed performance and reliability similar to new ones as they are rigorously tested and repaired to function correctly
 Refurbished servers have an

extended lifespan compared

- to new servers as they are professionally maintained and monitored by refurbished hardware vendors

 Refurbished servers come with
- advanced part replacement support in most cases
 Refurbished servers offer best-in-class performance and

extended warranty, and are

professionally re-engineered

a lifetime warranty and

before being sold, which isn't the case with used servers
