

HOW TO EFFECTIVELY COMBAT NETWORK EQUIPMENT SHORTAGE

Do you know that lead times for IT hardware are expected to remain high till 2023? It takes approximately 400 days to get networking equipment at a comparatively high price. Equipment shortage has become the world's biggest concern post-pandemic.

Organizations need to think of sustainable options to overcome equipment shortages.

Common Reasons for Equipment Shortage

Equipment shortages have broken the record across all network categories and device types. It has affected a wide range of equipment customers. The significant causes of equipment shortage include:

High demand for processing chips and semiconductor

Longer lead times for larger and more complex devices in a data center

Top Ways to Combat Network Equipment Shortage

Enterprises are losing patience with the extended lead times. They need to fulfill the requirement and shortage quickly to run their business operations efficiently.

To overcome the equipment shortage, they need to:

Optimize existing assets

Migrate workloads to the cloud

Adopt sustainable hardware refresh

Invest in refurbished hardware

Leverage strategic procurement

How CXtec equal2new® Deals with the Shortage

CXtec equal2new helps you adopt sustainable practices and combat the equipment shortage. It offers high-quality, reliable, stable, pre-owned equipment that gives businesses the advantage of:

Massive cost savings

Minimal carbon footprint

Impressive lifetime warranty with advance replacement

Stringent industry-leading testing and ISO-certified quality checks

Huge inventory of top brands

Fulfill your hardware requirement with reduced lead time.
