

## Delivering expert professional services around the globe

CXtec provides in-depth expertise to any IT project at your locations anywhere in the world.

We're here to help augment your staff's ability to deliver projects on-time and on-budget. Our project management team has decades of experience successfully completing large-scale, multi-site IT projects on time and with the highest quality.

Our model leverages a fully integrated platform to allow transparency in our communication, a strong governance model, and a constant feedback loop to ensure we adjust immediately. This structured agility allows us to adapt quickly to your needs to ensure success.

### World-Class Facilities

#### Staging and Configuration

State-of-the-art staging and configuration center where our engineers can re-create your live network environment to pre-configure complex solutions and test them in a safe environment prior to implementation.

#### Testing Lab

In-house live network testing facility where we can analyze technology in real-world networking scenarios through hands-on demos illustrating the effectiveness of any potential solution.

## Professional Services

### INSTALLATION

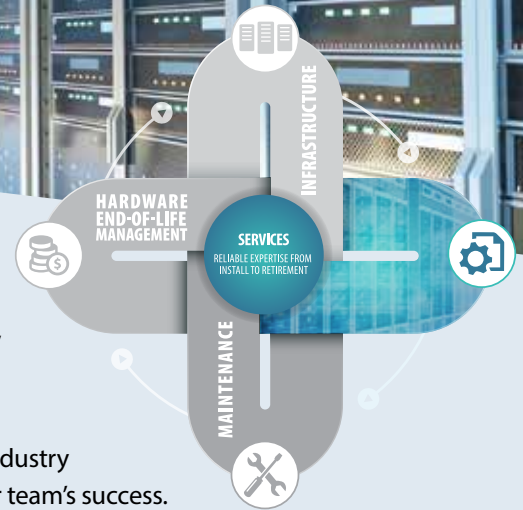

Staff augmentation is our goal. Save valuable time and resources by having our team work as an extension of yours during installation. There's no need to sacrifice quality or to limit your technology vision – with CXtec's installation services, your project can be completed on time and within budget.

- Networking installations (including switches, routers, firewalls, and more)
- Wireless installations (including site surveys and AP/controller installations)
- Server installations (including VMware and Hyper-V migrations)
- Storage installations (including NetApp, Dell EMC, and Nimble)

# Enabling Your Success

We work with the full spectrum of IT projects and oversee all aspects of every project, whether it's an emergency replacement, a cable installation, or a multi-site planned hardware migration.

Our job is to remove the logistics burden from you and your team, so we adhere to industry standards for project and quality management – delivering results and enabling your team's success.

## Guiding Principles

- We believe in facilitating your success.
- We augment your staff with our expertise.
- We enable process maturity and automation.
- We focus on comprehensive planning and risk management.
- We communicate proactively.
- We aggressively handle issues.
- We value your time.

### Data Center Cabling

Our CABLExpress® division manufactures high-performance data center cabling solutions, and our architects can help you design a cabling solution that will meet your needs for generations of updates. And we can help you implement it smoothly and efficiently – running structured copper or fiber cabling in your data centers and offices – without disrupting your core business.

### Assessments

Our technology assessment tool provides you with visibility into the security and overall efficiency of your network, while our wireless, network, virtualization, and voice readiness assessments help you build a plan that satisfies current issues and meets the ever-changing needs of your organization.

### IT Asset Disposition

Through our Atlantix Global division, we provide full IT asset disposition, decommissioning, and data security services for your data center technology equipment.

- 100% data eradication with MindSafe™ security measures (including on/offsite data erasure/destruction)
- Full technical de-installation, packing/crating services, and transportation logistics
- We remarket any of your technology with industry worth and provide maximum value to you
- Safe and responsible disposal of your equipment using environmentally responsible methods of recycling
